A Brief Letter

FROM THE PRESIDENT

I should like to invite all the members of the Missouri Association of Registered Architects, and their wives or girl friends, to the "Annual Architects Day" meeting which will be conducted at Jefferson City, Missouri on Saturday, May 5th, beginning with a morning business meeting immediately after Registration. All Architects-in-training are urged to be with us on this day. For our fourth annual meeting we are pleased to present the program on a succeeding page. Many of our speakers and Panel discussion members are nationally known and we assure you of an interesting meeting with informative discussions of interest to all Architects.

We urge all Architects to attend whether members of the Missouri Association of Registered Architects or not. We should like you to attend if possible. Bring your wives and have a fine week end drive, to and from the meeting. The dogwood should make an appearance about this time!

In thanking all the Officers, Directors, Committee members and our good friend Senator A. L. McCawley, for their unselfish devotion to our cause, I should be remiss not to thank those who will be with us as Speakers and Panel members. It is a long trip for many of the people who are directly responsible for the success of any meeting, and herewith I should like, on behalf of the Missouri Association of Registered Architects, to thank all those who will have taken part in the meeting, and those who have so faithfully worked with me in the activities of this Association.

I am only too cognizant that I have been able to add little to the affairs of this group and that too little time has been available to render service to the organization in carrying on the work that remains. It is my hope that my successor may be able to allot enough time to conduct a much better program of stewardship than it was possible for me to accomplish. Our Committees have been very active and much good should result from the efforts of those who have conducted the various hearings, and aided in the successful conclusions reached in our meetings.

I have been happy to have served for the past several years as a director, officer and finally, your President. I am grateful for the honor of serving you in some small measure, and with my best wishes for your continued growth and success, I am

Sincerely

A handwritten signature in dark ink, reading "L. Q. Willis". The signature is written in a cursive, flowing style with a large, prominent "L" and "W".

ANNUAL *"Architects Day"* PROGRAM

SATURDAY MAY 5, 1956
JEFFERSON CITY, MISSOURI

9:30 A.M. – 10:30 A.M.	Registration	Jefferson Building

There will be space for Architectural Exhibits for all who wish to bring photographs, renderings or models. Contact John Monroe at the morning meeting.

Attention members: – Please send reservations for rooms direct to Mr. C. M. Warren, Manager, Missouri Hotel, Jefferson City, Mo. Send reservations for Luncheon and Dinner tickets direct to Dave P. Clark, Treasurer, 321 Miller Building, Columbia, Missouri. They may also be obtained at the Jefferson Building when you are in for Registration.

George Cline Smith

Dr. George Cline Smith is vice-president and economist and a member of the Board of Directors of F. W. Dodge Corporation in New York. A specialist in construction industry trends and general business conditions, Dr. Smith also serves as economic consultant to *Architectural Record* magazine and to Sweet's Catalog Service, and is editor of the Corporation's monthly bulletin, *Building Business*.

Dr. Smith's background includes a wide variety of experience in practical business economics and in public relations. He is the author of scores of articles and pamphlets on business subjects. Before joining F. W. Dodge Corporation, he spent six years with the U. S. Chamber of Commerce in Washington, as economist and as manager of the Chamber's Finance Department, in charge of its work on national tax policy.

He has also been an economist for two government agencies, the War Production Board and the Department of Commerce, and has had numerous advisory posts for other agencies, including the Bureau of the Budget, the Census Bureau and the Department of Labor. Currently Dr. Smith is a consultant to the Business Advisory Council of the Department of Commerce, and a member of construction advisory committees of the Census Bureau and the Bureau of Labor Statistics. He is also vice chairman of the Business and Economic Statistics Section of the American Statistical Association.

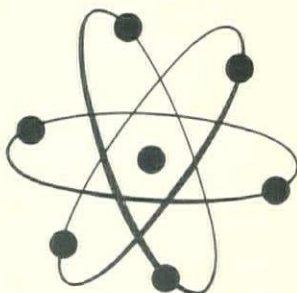

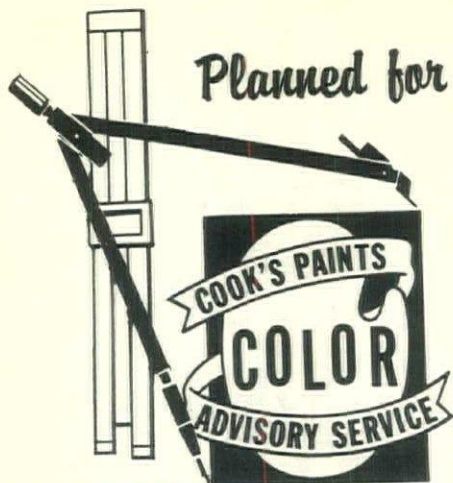

As a Naval Intelligence officer in World War II, Dr. Smith served with Navy, Army, Marine and Air Force units in the Pacific area.

Born in Maryland, Dr. Smith has been a resident of Baltimore, St. Louis, Washington and currently lives in Greenwich, Connecticut. He holds A. B., A. M. and Ph. D. degrees from Washington University in St. Louis.

* * *

The publications and services of F. W. Dodge Corporation include: Dodge Reports of contract awards for future construction in the 37 states east of the Rockies, *Architectural Record*, Sweet's Catalog Service, Dodge Books, Dodge Bulletins, *Daily Pacific Builder* (San Francisco), *Chicago Construction News*, *Denver Daily Journal*, *Real Estate Record and Builders' Guide* (New York).

Three Dollars for What?

The payment of dues for membership in any organization is frequently the cause of resentful feelings. When the organization is state-wide, and for the most part unseen by the membership, it is very apt to develop.

These "rumblings" are occasionally picked up by the secretary, if nobody else. In looking back over a year's time it appears safe to say that any feeling of dissatisfaction, expressed or not, is based upon ignorance and lack of understanding rather than the lack of expected results for dues paid.

It should be clearly borne in mind that the Missouri Association of Registered Architects is organized for a specific purpose. Without going into too much detail, it may be said that the purpose is to win a place of respect in society to which we can point with pride. It might be impossible to aspire to that place in society which is so enviably held by the medical profession. On the other hand, there is much that we can do; and it is being done gradually. It should be remembered here that the medical profession took centuries to reach the status of respect which it now holds.

Any well respected organization must commence with a certain minimum "self respect". Self respect begins with the individual. This, of course, implies a certain minimum discipline to be adhered to by the individual architect. The possession of a registration certificate is not only a right; it is also a privilege. This is true of any organized professional effort. The possession of a registration is not an end in itself; it is merely a means to an end. Because a man possesses a certificate of registration and can use a seal upon a set of blue prints, is not the sole purpose for his existence as an architect. These in themselves are only symbols of something which is greater. These symbols are instruments of the profession carrying only that importance which the user attributes to them. Obviously, nobody would think of dragging the flag of his Country in the mud willfully. To a lesser degree, nobody should think of using his seal promiscuously."

All of the above is preliminary to the one big point with which we are still confronted, perhaps more than any other in the activities of our association. Respect for the seal and its proper use *must* be engendered in the profession before we can begin to expect to be considered as the leaders in our industry in fact rather than fancy.

The Ethics and Practice Committee has done an excellent job, together with the Registration Board in this effort to develop the necessary respect for the use of the seal. Many cases have been reviewed and disposed of this year. For reasons which should be obvious, names are not advertised. However, this does not impair the success of our efforts. More cases are coming to the attention of this committee, and we expect more will continue to come in.

In conclusion, one good answer which can be given to the question, "For what am I paying \$3.00?", is the attainment and maintenance of a minimum discipline in the profession. It goes without saying that the members are expected to cooperate. If you have a grievance, present the grievance where it will do some good. We might refer to the time honored quotation, "If we please you, tell others; if we displease you, tell us". If the individual member has a grievance, there are certain simple rules to be followed. First, be certain of your facts; second, present them clearly and carefully; and thirdly, do not expect somebody else to do *all* of the work involved in rectifying the grievance.

John Sweeney, Secretary

you can have

- ✓ Quality
- ✓ Construction Simplicity
in Industrial Building

for

\$1.17
PER
SQ.
FT.

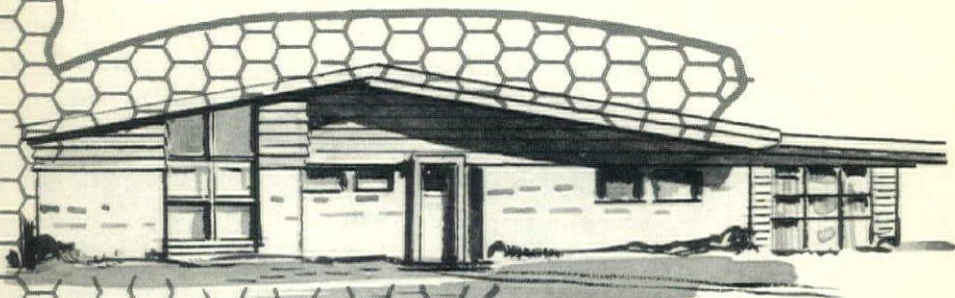

We would like to show you a construction technique for commercial buildings that uses precast HAYDITE concrete columns, beams, purlins and roof slabs. The cost can be as little as \$1.17 per sq. ft. erected for these members.

You can call Mr. Glen Roderique, the Carter-Waters Product Engineer, at your convenience. In the meantime, write in for your free copy of "Precast Haydite Concrete". This illustrated, descriptive booklet shows you how to build better at less cost.

***Notice* TO ALL REGISTERED PROFESSIONAL ENGINEERS AND TO ALL REGISTERED ARCHITECTS**

BE IT RESOLVED, that all regular and special meetings of the Board shall be open to the public and that all citizens interested in the proceedings of the Board may attend such meetings at pleasure and that the officers, directors and members of the Executive Committee and the Committees on Ethics and Practice of Architecture or Professional Engineering are cordially invited to attend the regular and special sessions of the meetings at their convenience and pleasure; provided this resolution shall not be so construed as to prevent the Board and each of its Divisions from holding executive sessions when any such session shall be deemed in the public interest; and provided further that no action affecting adversely the interests or rights of any registered architect or registered professional engineer or the general public shall be finally taken at any executive session of the Board or of either of its Divisions; and

BE IT FURTHER RESOLVED, that the Secretary furnish copies of this resolution to architectural and engineering publications in Missouri.

(This resolution was adopted by the state Board of Registration for Architects & Professional Engineers at a recent Meeting.)

REGULATION____. If any registered architect or registered professional engineer shall release for the purpose of receiving bids and awarding contracts for construction any plans and specifications requiring the approval of the Division of Health, the Department of Education, or other agencies of government, State or local, without such approval, or, shall authorize the beginning of any construction, as described by the plans and specifications which are required to be approved by the Division of Health, the Department of Education, or other agencies of government, State or local, without such approval, shall be cited to appear before the Board and show cause why his registration should not be suspended or revoked.

(This regulation was adopted by the State Board of Registration for Architects & Professional Engineers at a recent meeting.)

TO ALL UNREGISTERED ARCHITECTS OVER THE AGE OF 36 YEARS AND ALL UNREGISTERED PROFESSIONAL ENGINEERS OVER THE AGE OF 45 YEARS

Section 327.032, Revised Statutes of Missouri 1949, page 690, 1955 Cumulative Supplement, provides that:

"No registration shall be granted on oral examination only to any applicant filing his application for registration after the thirtieth day of June, 1956."

Blank forms for filing application for registration will be furnished on written request addressed to the undersigned Board.

This notice is published as a courtesy and not pursuant to any requirement of law. Everyone must decide for himself whether or not he will apply for registration.

**STATE BOARD OF REGISTRATION FOR
ARCHITECTS AND PROFESSIONAL ENGINEERS**

Box 184

Jefferson City, Missouri

Attention:

ALL ARCHITECTURAL GRADUATES AND ALL ENGINEERING GRADUATES, GRADUATING BETWEEN AND INCLUDING THE CALENDAR YEARS 1949 AND 1955

Any graduate from a fully accredited course in architecture in an architectural school approved by the Board as of satisfactory standing, who graduated between, and including the years 1949 and 1955, may if he so desires, be enrolled as an engineer-in-training without examination on proper application filed with the Board on or before June 30, 1956, and payment of an enrollment fee of \$5.00; and

Any graduate from a fully accredited course in engineering in an engineering school approved by the Board as of satisfactory standing, who graduated between and including the years 1949 and 1955 may, if he so desires, be enrolled as an engineer-in-training without examination, on proper application filed with the Board on or before June 30, 1956, and payment of an enrollment fee of \$5.00.

The Board would appreciate the cooperation of the Deans and faculties of all schools of architecture and all schools of engineering; the officers and directors of the Missouri State Association of Registered Architects and the Missouri Society of Professional Engineers and the officers and members of its several chapters; and the officers and members of the several chapters of the American Institute of Architects, and the several chapters of the Founder's Societies of Engineers, in passing this information along, to the end that every graduate in engineering be fully advised of his right to enrollment as an architect-in-training or as an engineer-in-training without examination if he so desires.

This advertisement is published as a courtesy to all interested parties and not pursuant to the requirements of any law.

Contemporary Elegance . . .

. . . achieved by Architect August Perez and Associates in the superbly tasteful interior of the Progressive Bank of New Orleans. Sharp, clean lines are effectively emphasized by dramatic contrast between two magnificent marbles — the rich, gleaming chestnut of French Rouge Antique against the light buff and gold of Creme Perla. Here again marble has been imaginatively used to compliment a well-planned design with its wonderful, natural beauty.
